

## 新东方苏红：2014 年 12 月六级写作范文解析

大连新东方学校

### 1. 考察题目

本次六级中三个写作题目：科技在教育中是否必要，学习中是否有捷径，以及学历在面试中的重要性。教育 科技 学习属于咱们所说的 3S(society science, student), 话题不是偏难型的，且在以前也考察过它们的变形，相信大家通过对真题的练习，能相对容易的完成这次的题目。

### 2. 答题方向及要点

六级重点考察学生的描图能力和论证能力，是咱们历年所有题目类型考察最多的

现象型文章，通过一副图画引出相关话题，并对此进行分析。因此，在答题时需要注意逻辑性，提出现象和论点-论证-总结或者建议措施。首段需要大家引出图画内容，确定本篇文章的论点，也就是作者的态度和看法。在第二段，大家可以参照咱们课堂讲过的原因段，影响段及观点论证段的写法。第三段写法，大家可以采取总结前文的方式结尾，也可以提出一些个人建议升华主题。祝大家好运！

#### 范文一：

The cartoon, apparently and obviously, portrays that in the interview of a youngster's hunting for a job, he is declined as his diploma is lower than that is required by the corporation. It is a universal truth that a multitude of enterprises progressively select their future employees by judging their degrees in most occasions.

This phenomenon exerts substantial consequences on our day-to-day life, as can be showed in the following aspects. For one thing, as to the job-hunters, they would spend longer time pursuing degrees. As a result, they would overestimate their ability, both theoretically and practically and expect a pretty decent job which is not achievable at the very beginning. For another, the companies, attempting to recruit high-quality workers, trust excessively higher diplomas. As we know, not every job demands a high education, especially some basic skills like cooking and driving.

In conclusion, some factors must be taken into account. Education is of great significance admittedly, yet the actual criteria for different professions vary to a large extent. That is to say, high education is not the unique standard for an appropriate job.

## 范文二：

Whether there is any shortcut to learning

The cartoon, apparently and obviously, portrays that the young man, curiously and eagerly, is inquiring where to search for the book named How to Do Well in School without Studying, while the librarian suggests him to hunt for it in the fiction section. It is revealed in the above picture that shortcut to studying is just imaginary.

Here are evidences why there is no shortcut to learning. First and foremost, it is a complex that learning itself is. It is not only the

knowledge individuals have to obtain, but also critical thinking and communication skills are indispensable elements of learning which cannot be gained by merely studying books. In addition, there are, in reality, a couple of shortcuts to learning. Along with the progress of technology, various sorts of studying software or websites emerge, which assist students studying more conveniently and efficiently. However, it does not mean they are shortcuts.

To sum up, there appears to be some convenient studying methods. Nevertheless, studying must be accomplished step by step. Just keep in mind: no pain, no gain.
