

China is one of the most ancient cultures on earth. Many elements which form the modern foundation of the world come from China. Its economy is the most fast-growing in this planet, and it is experiencing a new industrial revolution. China also starts an ambitious project of space exploration, including building a space station in 2020. So far, it is one of the biggest export countries and it is attracting a large amount of foreign investment. Meanwhile, it invests billions of dollars overseas as well. In 2011, China surpassed Japan to become the second largest economy in the world.
