

## 2015年6月英语六级真题写作

2015年6月的六级真题写作部分, 采取了2011年12月至2014年6月以来最常考察的类型——英语引语型。这也是我们上课着重练习和讲解的, 以下三篇范文都用到了我们课上教授的模板书写, 不仅表达了自己的想法, 同时使用模板句大大缩短了写作时间、减少了语法错误, 让写作变得更为清楚。题一的主题是知识是宝库, 但练习才是开启它的钥匙, 着重去写练习的重要性。题二的主题是我没有什么特别的才能, 就是充满了好奇, 着重去写好奇心的重要性。题三的主题是如果你做不了大事, 就以一个最好的方式把小事完成, 着重去写做小事的重要性(跟2013年四级的爸爸让孩子倒垃圾桶的漫画作文题话题一致, 都写做小事)。三套题全部是英语引语型, 第二段都是分析为啥这样做? 第三段可以写怎么做? 也可以进行总结。

### 题一:

Knowledge is a treasure, as the remark has it, but practice is the key to it. To put it another way, only by practice can we achieve knowledge indeed. Simple as the remark may sound, it conveys a thought-provoking notion that when we are learning knowledge, we are supposed to practice repeatedly.

The reasons why we should practice involve factors in mounting numbers. They can be briefly summed up as follows. Initially, one of the most contributing causes is that it can lay a solid foundation for learning further knowledge. Additionally, the fundamental reason mainly stems from the fact that it can cultivate the confidence and courage. Finally, there are, still, other influential factors standing out among them. It is the practice that makes us strong and give us precious experience to carry out the knowledge we have learnt. Ma Yun is often cited as a prime example of this topic. How could Ma Yun become a successful businessmen without practice?

From what has been discussed above, we may safely arrive at the conclusion that if you work at it hard enough, you can grind an iron rod into a needle. Nothing is difficult if you put your heart into it and practice it.

题二：谚语评论 I have no special talents. I am only passionately curious

I have no special talents, as the remark has it, I am only passionately curious. To put it another way, only by doing everything curiously can we achieve success. Simple as the remark may sound, it conveys a thought-provoking notion that when we have the curiosity to the world, we can become the real talented people.

The reasons why we should be curious involve factors in mounting numbers. They can be briefly summed up as follows. Initially, one of the most contributing causes is that it can give us interest to probe into the world. Additionally, the fundamental reason mainly stems from the fact that during the process of being curious to something, we can maintain freshness instead of boredom, which will make us learn new knowledge constantly. Finally, there are, still, other influential factors standing out among them. It is the curiosity that makes endless contributions to the society. Steve Jobs is often cited as a prime example of this topic. How could Jobs launch so many powerful products without being curious?

From what has been discussed above, we may safely arrive at the conclusion that if you keep the curiosity to the whole word, you can find the things you are fond of.

题三：谚语评论 If you cannot do great things. Do small things in a great way.

If you cannot do great things, as the remark has it, do small things in a great way. In other words, we can achieve our goals by doing something small. Simple as the remark may sound, it conveys a thought-provoking notion that we cannot emphasize the significance of doing small things too much.

The reasons why we should focus our time and energy on doing something trivial involve factors in mounting numbers. They can be briefly summed up as follows. Initially, one of the most contributing causes is that it can lay a solid foundation for undertaking big things. Additionally, the fundamental reason mainly stems from the fact that by doing small things it can give us endless courage and confidence to face the

responsibilities or obstacles in life . Finally, there are, still, other influential factors standing out among them. It is a process of accumulating wisdom, which is extremely benignant to significant things. No better illustration can be thought than the example mentioned below. Only when we recite words fluently can we prepare CET-6 well.

From what has been discussed above, we may safely arrive at the conclusion that a -thousand -mile journey begins with the first step.
