

六级作文题: 随着信息技术的发展, 获取有用信息很困难。

解析: 在上午四级作文考察了六级作文的常考类型之后, 六级作文果不其然出现了四级的重点考察类型: 漫画作文。但由于六级早在 2012 年 6 月和 2014 年 12 月考察了漫画, 所以也不算出其不意, 我们还是有所准备。这个话题跟 2013 年 12 月的六级作文题达到了惊人的一致, “A wealth of information creates a poverty of attention.”那个题是写信息爆炸导致注意力缺乏的, 而今天的题说的是信息技术发展, 获取有用信息很困难, 话题非常相似。第一段描述漫画, 第二段分析为何获取有用信息困难, 第三段说说如何解决这个现象即可。参考范文如下:

From the cartoon given above, we can observe that there is a man complaining a great deal of information springs up from all walks of life but we don't have much useful information. Simple and common as the drawing may seem, it contains abundant life philosophy and informs us of the significance of acquiring useful information.

The reasons why it is difficult to obtain useful information involve many factors. They can be briefly summed up as follows. Initially, one of the most contributing causes is that surrounded by advanced information technology, an increasing number of people are unaware of available and beneficial information independently. Additionally, the fundamental reason mainly stems from the fact that we lack the ability and energy to choose which our real demand is. Finally, a large amount of information leads to a poverty of attention, which makes us lose our mind in complicated content. A case in point centers on the popping up advertisement of website. When we want to download a software, the thing we get always is a rogue software.

Given all the above arguments, it is high time that we put an end to this undesirable phenomenon. No better method could be found to address it than strengthening supervision and administration on the sources we get information from. It is just a beginning, which is far from enough. We also are obliged to control ourselves and realize what our real demand is.
