

## 2016年6月英语四级考试阅读答案

第一套

选词填空：

**Part III Reading Comprehension (40 minutes)**

**Section A**

**Directions:** In this section, there is a passage with ten blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before making your choices. Each choice in the bank is identified by a letter. Please mark the corresponding letter for each item on **Answer Sheet 2** with a single line through the centre. You may not use any of the words in the bank more than once.

Signs barring cell-phone use are a familiar sight to anyone who has ever sat in a hospital waiting room. But the 26 popularity of electronic medical records has forced hospital-based doctors to become 27 on computers throughout the day, and desktops – which keep doctors from bedsides – are 28 giving way to wireless devices.

As clerical loads increased, “something had to 29, and that was always face time with patients,” says Dr. Bhakti Patel, a former chief resident in the University of Chicago’s internal-medicine program. In fall 2010, she helped 30 a pilot project in Chicago to see if the iPad could improve working conditions and patient care. The experiment was so 31 that all internal-medicine residents at the university now get iPads when they begin the program. Johns Hopkins’ internal-medicine program adopted the same 32 in 2011. Medical schools at Yale and Stanford now have paperless, iPad-based curriculums. “You’ll want an iPad just so you can wear this” is the slogan for one of the new lab coats 33 with large pockets to accommodate tablet computers.

A study of the University of Chicago iPad project found that patients got tests and 34 faster if they were cared for by iPad-equipped residents. Many patients also 35 a better understanding of the illnesses that landed them in the hospital in the first place.

A) dependent	I) policy

选词填空

**Part III Reading Comprehension (40 minutes)**

**Section A**

**Directions:** In this section, there is a passage with ten blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before making your choices. Each choice in the bank is identified by a letter. Please mark the corresponding letter for each item on **Answer Sheet 2** with a single line through the centre. You may not use any of the words in the bank more than once.

Contrary to popular belief, older people generally do not want to live with their children. Moreover, most adult children 26 every bit as much care and support to their aging parents as was the case in the "good old days", and most older people do not feel 27.

About 80% of people 65 years and older have living children, and about 90% of them have 28 contact with their children. About 75% of elderly parents who don't go to nursing homes live within 30 minutes of at least one of their children.

However, 29 having contact with children does not guarantee happiness in old age. In fact, some research has found that people who are most involved with their families have the lowest spirits. This research may be 30, however, as ill health often makes older people more 31 and thereby increases contact with family members. So it is more likely that poor health, not just family involvement, 32 spirits.

Increasingly, researchers have begun to look at the quality of relationships, rather than at the frequency of contact, between the elderly and their children. If parents and children share interests and values and agree on childrearing practices and religious 33, they are likely to enjoy each other's company. Disagreements on such matters can 34 cause problems. If parents are angered by their daughter's divorce, dislike her new husband, and disapprove of how she is raising their grandchildren, 35 are that they are not going to enjoy her visits.

A) abandoned	I) frequent
B) advanced	J) fulfillment
C) biased	K) grant
D) chances	L) merely
