## History of the TOEFL® Test

The *TOEFL*® test is designed to measure the English-language proficiency of people whose native language is not English. *TOEFL* scores are accepted by more than 9,000 colleges, universities, and licensing agencies in more than 130 countries. The test is also used by governments, and scholarship and exchange programs worldwide.

**The TOEFL Program** — A national council on the testing of English as a foreign language was formed in 1962; its members were representatives of more than 30 private organizations and government agencies concerned with the English-language proficiency of non-native speakers of English who wished to study at colleges and universities in the United States. The council supported the development of the *TOEFL* test for use starting in 1963-64. Financed by grants from the Ford and Danforth Foundations, the *TOEFL* program was first administered by the Modern Language Association. In 1965, the College Board® and Educational Testing Service® (ETS®) assumed joint responsibility for the program. Because many who take the *TOEFL* test are potential graduate students, a cooperative arrangement for the operation of the program was entered into by ETS, the College Board, and the Graduate Record Examinations® Board in 1973. Under this arrangement, ETS is responsible for administering the *TOEFL* program with guidance from the *TOEFL* Board.

The *TOEFL* Board is comprised of 16 members. Some are affiliated with such institutions and agencies as undergraduate and graduate schools, community colleges, nonprofit educational exchange organizations, and other public and private agencies with an interest in international education. Other members are specialists in the field of English as a foreign or second language.

**Development of the Test** — The test originally contained five sections. As a result of extensive research, a three-section test was developed and introduced in 1976. In July 1995, the test item format was modified somewhat within the same three-section structure. In recent years, various constituencies called for a new *TOEFL* test that would (1) be more reflective of communicative competence models; (2) include more constructed-response tasks and direct measures of writing and speaking; (3) include tasks that integrate the language modalities tested; and (4) provide more information than the paper-based *TOEFL* test (*TOEFL PBT*) about the ability of international students to use English in an academic environment. Accordingly, the *TOEFL* Board initiated a broad effort under which language testing will evolve in the twenty-first century. The introduction of the computer-based *TOEFL* test (*TOEFL CBT*) in 1998 was the first incremental step in this broad test-improvement effort.

The next step was the introduction of the *TOEFL iBT*® test, delivered via the Internet, in September 2005. The *TOEFL iBT* test assesses all four language skills (reading, listening, speaking, and writing) that are important for effective communication. The test emphasizes integrated skills and provides better information about test takers' ability to communicate in an academic setting and their readiness for academic coursework. The test was first launched in the United States and was gradually rolled out worldwide during 2005 and 2006.

As the *TOEFL iBT* test was introduced in an area, *TOEFL CBT* testing was discontinued after a period of overlap to ensure a smooth transition. The final administration of the *TOEFL CBT* test was held in September 2006. *TOEFL PBT* testing is being phased out and is currently offered only in locations where testing via the Internet is not available. This *TOEFL Test and Score Data Summary* contains information about *TOEFL iBT* test takers.

# The TOEFL iBT® Test

The TOEFL iBT test was introduced in the United States in September 2005 and was gradually introduced worldwide during 2005 and 2006. The test was developed in response to a request by

institutions to provide a test that would measure nonnative speakers' ability to **communicate** in English in an academic setting.

The TOEFL iBT test:

- Measures the ability to communicate by combining, or integrating, all four language skills – Reading, Listening, Speaking, and Writing
- Is 100% academically focused, measuring the kind of English used in academic settings
- Provides fair and objective scoring
- Provides valid and reliable information to support score users in making effective decisions regarding a test taker's English-language proficiency

Test takers have up to four hours to complete the test, and all four sections are taken on the same day. The Reading section measures the ability to understand academic reading material written in English, and the Listening section measures the ability to understand spoken English as it is used in colleges and universities. The Speaking section consists of six tasks that measure the ability to speak in English in an academic setting. The Writing section consists of two tasks that measure the ability to write in English in a way that is appropriate for college and university coursework. Some questions in the Speaking and Writing sections require test takers to combine, or integrate, information from more than one source. For example, test takers are asked to read a passage, listen to a short lecture about a topic, and then speak or write in response. These integrated tasks are designed to simulate the academic experience.

Internet delivery enables ETS to deliver the test at official test centers in more locations. Speaking and writing tasks receive multiple ratings to provide unbiased, objective evaluations of the responses.

**Test Preparation** — The TOEFL Program offers many test preparation products, both for free and for purchase, including free practice questions and the TOEFL iBT Interactive Sampler. The Sampler includes questions from all four sections of the test. The Reading and Listening sections are interactive and sample responses are provided for the Writing and Speaking questions.

For more information about test prep, visit the TOEFL website at [www.ets.org/toefl](http://www.ets.org/toefl).

Visit the TOEFL website at [www.ets.org/toefl](http://www.ets.org/toefl) for the most up-to-date information.

# Test Data for 2015

The data presented in the tables below are based on test takers who took the TOEFL iBT test between January 2015 and December 2015.

**Table 1. Observed Minimum and Maximum TOEFL iBT Section and Total Scores**

Section	Min.	Max.
1. Reading	0	30
2. Listening	0	30
3. Speaking	0	30
4. Writing	0	30

\*\*Based on examinees who responded to a question about gender group membership and also indicated a main reason for taking the TOEFL test.

**Tables 15 and 16** may be useful in comparing the performance on the TOEFL iBT test of a particular student with that of other students from the same native country and with that of students who speak the same language. **ETS, creator of the TOEFL test, does not endorse the practice of ranking countries on the basis of TOEFL scores, as this is a misuse of data.** The TOEFL test provides accurate scores at the individual level; it is not appropriate for comparing countries. The differences in the number of students taking the test in each country, how early English is introduced into the curriculum, how many hours per week are devoted to learning English, and the fact that those taking the test are not representative of all English speakers in each country or any defined population make ranking by test score meaningless.

<sup>1</sup> Because of the unreliability of statistics based on small samples, means are not reported for subgroups of less than 30, as indicated by\*. Due to rounding, section score means may not add up to the total score mean.

<sup>2</sup> Because of changes in region and/or country boundaries, certain languages may have been added or deleted since the previous table was published.

1 Because of the unreliability of statistics based on small samples, means are not reported for subgroups of less than 30, as indicated by*. Due to rounding, section score means may not add up to the total score mean.																	
2 Because of changes in region and/or country boundaries, certain countries may have been added or deleted since the previous table was published.																	

# The *TOEFL*<sup>®</sup> test is the BEST measure of academic English proficiency.

Using a high-quality test means more accurate decisions. ETS's in-depth, rigorous test design process ensures that the *TOEFL*<sup>®</sup> test is the highest-quality English-language proficiency assessment available.

The test is supported by more than 240 peer-reviewed research reports, books, journal articles and book chapters regarding test design and validity, multiple pilot tests and our commitment to ongoing research.
