

这是一道比较典型的解决(分析)问题型题目,题目中给出两个选项,要求给出选择和原因。解决(分析)问题型题目分三个类型,给原因、解决办法或两者兼有。这道题涉及到的就是第一种,给原因。那么我们在结构组织过程中就需要判断出每段需要写什么内容。首先在第一段给出背景,并引出题目,做出选择。第二段,给出2-3个选择某种工作的原因,进行适当解释。第三段,总结全文,写出因为什么原因,所以做出了怎样的选择。

注意本题不要和对比类题目混淆。并不是要求比较两种工作类型的优劣。只需要进行选择,并给出你选择的原因即可。

作文 1

Job selection is a big issue for almost every graduate. If asked to make a choice between starting up my own business and searching a job elsewhere, I will definitely choose the latter one.

There are two main reasons for my choice. First, establishing a new business always requires a great deal of money; however, most graduates do not have the funding since they have just stepped out of the university. If they desire the money, they

have got to ask that from parents, which is a burden to the family. Second, if one wants to be a big potato in his profession, he or she must have abundant experience in the relevant field, which is not possessed by the majority of graduates.

Therefore, as a student who will graduate from university lacking funding and experience, I would choose to find a job to collect the resources.

作文 2

Job selection is a big issue for almost every graduate. If asked to make a choice between a state-owned enterprise and a joint venture, I will definitely choose the latter one.

There are two main reasons for my choice. First, unlike state-owned business, the joint venture can provide an environment for me to meet more challenge and make increasing progress. The counterpart of state-owned business has a relatively comfortable circumstance with some routines, which doesn't seem attractive. Second, most joint ventures

have some technologies and managerial ideas from other countries, which is relatively different from that in China, bringing feelings of freshness to a graduate like me.

In conclusion, due to the occupation pattern and working concept, I suppose the work in joint venture appears more suitable to me.

作文 3

Job selection is a big issue for almost every graduate. If asked to make a choice between finding a job and carrying on further study, I will definitely choose the former one.

There are two main reasons for my choice. First, compared with specialized knowledge, work experience seems more useful in work place. Many graduates with advanced knowledge cannot adjust to the realistic working circumstance due to lack of practical experience. Second, getting involved in occupation can lessen families' financial burden to cultivate a university graduate. Besides, attending jobs immediately after graduation doesn't mean one is deprived of the opportunity

to acquire further study, since he or she can still participate some vocational courses after work.

In conclusion, because of the significance of working experience and the necessity for a graduate to make money, I will choose to work after graduation.
