

2017年12月大学英语六级考试真题3

**Part I**

**Writing**

**(30 minutes)**

**Directions:** For this part, you are allowed 30 minutes to write a short essay commenting on the saying "Help others, and you will be helped when you are in need." You can cite examples to illustrate your views. You should write at least 150 words but no more than 200 words.

**Part II**

**Listening Comprehension**

**(30 minutes)**

**Section A**

**Directions:** In this section, you will hear two long conversations. At the end of each conversation, you will hear four questions. Both the conversation and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then mark the corresponding letter on **Answer Sheet 1** with a single line through the centre.

**Questions 1 to 4 are based on the conversation you have just heard.**

1. A) They forbid businesses to produce more foods than needed.  
B) They facilitate the donation of unsold foods to the needy.  
C) They prohibit the sale of foods that have gone stale.  
D) They reward businesses that eliminate food waste.
2. A) It passed a law aiming to stop overproduction.  
B) It prohibited the promotion of bulk food sales.  
C) It voted against food import from outside Europe.  
D) It imposed penalties on businesses that waste food.
3. A) It has penalized businesses that keep overproducing foods.  
B) It has started a nationwide campaign against food waste.  
C) It has warned its people against possible food shortages.  
D) It has banned supermarkets from dumping edible foods.
4. A) Americans' habit of buying food in bulk.  
B) A lack of regulation on food consumption.  
C) The confusion over food expiration labels.  
D) The surplus resulting from overproduction.

**Questions 5 to 8 are based on the conversation you have just heard.**

5. A) It specializes in the sale of ladies' designer dresses.  
B) It offers regular weekend sales all the year round.  
C) It has just launched its annual anniversary sales.

- D) It has started a week-long promotion campaign.
6. A) Price adjustments within seven days of purchase.  
B) Free delivery of purchases for senior customers.  
C) Coupons for customers with bulk purchases.  
D) Price reductions for its frequent customers.
7. A) Give her some coupons.  
B) Credit it to her account.  
C) Allow her to buy on credit.  
D) Mail a gift card to her.
8. A) Complimentary tailoring.  
B) Prolonged goods warranty.  
C) Free installing of appliances.  
D) Refunding for goods returned.

**Section B**

**Directions:** *In this section, you will hear two long conversations. At the end of each conversation, you will hear four questions. Both the conversation and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C), and D). Then mark the corresponding letter on Answer Sheet 1 with a single line through the centre.*

**Questions 9 to 11 are based on the conversation you have just heard.**

9. A) They represent people from virtually all walks of life.  
B) They have twenty-four different body shapes in total.  
C) They have more than twenty different hair textures.  
D) They are thin, tall, and unlike real human beings.
10. A) They do not reflect young girls' aspirations.  
B) They are not sold together with the original.  
C) Their body shapes have not changed much.  
D) Their flat feet do not appeal to adolescents.
11. A) In toy stores.  
B) On the Internet.  
C) In shopping malls.  
D) At Barbie shops.

**Questions 12 to 15 are based on the conversation you have just heard.**

12. A) Metal type was imported from Korea.  
B) The earliest known book was published.  
C) Chinese printing technology was first introduced.  
D) Moveable metal type began to be used in printing.

13. A) It produced some 20 million volumes in total.  
 B) It helped the German people become literate.  
 C) It was the biggest printer in the 16th century.  
 D) It had more than a hundred printing presses.
14. A) It boosted the circulation of popular works.  
 B) It provided readers with more choices.  
 C) It made writing a very profitable career.  
 D) It pushed handwritten books out of circulation.
15. A) It accelerated the extinction of the Latin Language.  
 B) It promoted the growth of national languages.  
 C) It turned translation into a welcome professional.  
 D) It standardized the publication of grammar books.

### Section C

**Directions:** *In this section, you will hear three recordings of lectures or talks followed by three or four questions. The recordings will be played only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C), D). Then mark the corresponding letter on Answer Sheet 1 with a single line through the centre.*

**Questions 16 to 18 are based on the passage you have just heard.**

16. A) They choose a job without thinking it through.  
 B) They become stuck in the same job for decades.  
 C) They spend an average of one year finding a job.  
 D) They get bored after working for a period of time.
17. A) Decide which job is most attractive to you.  
 B) See if there will be chances for promotion.  
 C) Watch a film about ways of job hunting.  
 D) Find out what job choices are available.
18. A) The pay you are going to get.  
 B) The qualifications you have.  
 C) The culture of your target company.  
 D) The work environment you will be in.

**Questions 19 to 21 are based on the passage you have just heard.**

19. A) It is a religious festival celebrated by African-Americans.  
 B) It is an ancient festival celebrated by African-Americans.  
 C) It is a cultural festival founded for African-Americans.  
 D) It is as important as Christmas for African-Americans.

20. A) To call on African-Americans to worship their gods.  
 B) To urge African-Americans to do more for society.  
 C) To remind African-Americans of their sufferings.  
 D) To help African-Americans to realize their goals.
21. A) Faith in self-determination.                      C) Creative work and achievement.  
 B) The first fruits of the harvest.                    D) Unity and cooperative economics.
22. A) They recite a principle.                            C) They drink wine from the unity cup.  
 B) They take a solemn oath.                            D) They call out their ancestors' names.

Questions 23 to 25 are based on the recording you have just heard.

23. A) It contains large amounts of dairy products.  
 B) It began to impact the world in recent years.  
 C) It consists mainly of various kinds of seafood.  
 D) It is one of the world's most healthy diets.
24. A) It is regarded as one of the greatest researches of its kind.  
 B) It has drawn the attention of medical doctors the world over.  
 C) It was conducted in seven Mid-Eastern countries in the 1950s.  
 D) It involved 13,000 researchers from Asia, Europe and America.
25. A) They eat foods with little fat.                      C) They use little oil in cooking.  
 B) They have lower mortality rates.                    D) They care much about their health.

**Part III                                      Reading Comprehension                                      (40 minutes)**

**Section A**

**Directions:** *In this section, there is a passage with ten blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before making your choices. Each choice in the bank is identified by a letter. Please mark the corresponding letter for each item on Answer Sheet 2 with a single line through the centre. You may not use any of the words in the bank more than once.*

Many European countries have been making the shift to electric vehicles and Germany has just stated that they plan to ban the sale of vehicles using gasoline and diesel as fuel by 2030. The country is also planning to reduce its carbon footprint by 80-95% by 2050,   26   a shift to green energy in the country. Effectively, the ban will include the registration of new cars in the country as they will not allow any gasoline   27   vehicle to be registered after 2030.

Part of the reason this ban is being discussed and   28   is because energy officials see that they will not reach their emissions goals by 2050 if they do not   29   a large portion of vehicle emissions. The country is still   30   that it will meet its emissions goals, like reducing emissions by 40% by 2020, but the   31   of electric cars in the country has not occurred as fast as expected.

Other efforts to increase the use of electric vehicles include plans to build over 1 million hybrid and electric car battery charging stations across the country. By 2030, Germany plans on having over 6 million charging stations \_\_\_32\_\_\_. According to the *International Business Times*, electric car sales are expected to increase as Volkswagen is still recovering from its emissions scandal.

There are \_\_\_33\_\_\_ around 155,000 registered hybrid and electric vehicles on German roads, dwarfed by the 45 million gasoline and diesel cars driving there now. As countries continue setting goals of reducing emissions, greater steps need to be taken to have a \_\_\_34\_\_\_ effect on the surrounding environment. While the efforts are certainly not \_\_\_35\_\_\_, the results of such bans will likely only start to be seen by generations down the line, bettering the world for the future.

A) acceptance	D) incidentally
B) currently	J) installed
C) disrupting	K) noticeable
D) eliminate	L) powered
E) exhaust	M) restoration
F) futile	N) skeptical
G) hopeful	O) sparking
H) implemented	

## Section B

**Directions:** In this section, you are going to read a passage with ten statements attached to it. Each statement contains information given in one of the paragraphs. Identify the paragraph from which the information is derived. You may choose a paragraph more than once. Each paragraph is marked with a letter. Answer the questions by marking the corresponding letter on **Answer Sheet 2**.

### Apple's Stance Highlights a More Confrontational Tech Industry

- A) The battle between Apple and law enforcement officials over unlocking a terrorist's smartphone is the culmination of a slow turning of the tables between the technology industry and the United States government.
- B) After revelations by the former National Security Agency contractor Edward J. Snowden in 2013 that the government both *cozied up to* (讨好) certain tech companies and hacked into others to gain access to private data on an enormous scale, tech giants began to recognize the United States government as a hostile actor. But if the confrontation has crystallized in this latest battle, it may already be heading toward a predictable conclusion: In the long run, the tech companies are destined to emerge victorious.
- C) It may not seem that way at the moment. On the one side, you have the United States government's mighty legal and security apparatus fighting for data of the most sympathetic sort: the secrets buried in a dead mass murderer's phone. The action stems from a federal court order issued on Tuesday requiring Apple to help the Federal Bureau of Investigation (F.B.I) to unlock an iPhone used by one of the two attackers who killed 14

people in San Bernardino, California, in December.

- D) In the other corner is the world's most valuable company, whose chief executive, Timothy D. Cook, has said he will appeal the court's order. Apple argues that it is fighting to preserve a principle that most of us who are addicted to our smartphones can defend: Weaken a single iPhone so that its contents can be viewed by the American government and you risk weakening all iPhones for any government intruder, anywhere.
- E) There will probably be months of legal tussling, and it is not at all clear which side will prevail in court, nor in the battle for public opinion and legislative favor. Yet underlying all of this is a simple dynamic: Apple, Google, Facebook and other companies hold most of the cards in this confrontation. They have our data, and their businesses depend on the global public's collective belief that they will do everything they can to protect that data.
- F) Any crack in that front could be fatal for tech companies that must operate worldwide. If Apple is forced to open up an iPhone for an American law enforcement investigation, what is to prevent it from doing so for a request from the Chinese or the Iranians? If Apple is forced to write code that lets the F.B.I. get into the Phone 5c used by Syed Rizwan Farook, the male attacker in the San Bernardino attack, who would be responsible if some hacker got hold of that code and broke into its other devices?
- G) Apple's stance on these issues emerged post-Snowden, when the company started putting in place a series of technologies that, by default, make use of encryption to limit access to people's data. More than that, Apple - and, in different ways, other tech companies, including Google, Facebook, Twitter and Microsoft - have made their opposition to the government's claims a point of corporate pride.
- H) Appl's emerging global brand is privacy; it has staked its corporate reputation, not to mention the investment of considerable technical and financial resources, on limiting the sort of mass surveillance that was uncovered by Mr. Snowden. So now, for many cases involving governmental intrusions into data, once-lonely privacy advocates find themselves fighting alongside the most powerful company in the world.
- I) "A comparison point is in the 1990s battles over encryption," said Kurt Opsahl, general counsel of the Electronic Frontier Foundation, a privacy watchdog group. "Then you had a few companies involved, but not one of the largest companies in the world coming out with a lengthy and impassioned post, like we saw yesterday from Tim Cook. The profile has really been raised."
- J) Apple and other tech companies hold another ace: the technical means to keep making their devices more and more inaccessible. Note that Apple's public opposition to the government's request is itself a hindrance to mass government intrusion. And to get at the contents of a single iPhone, the government says it needs a court order and Apple's help to write new code; in earlier versions of the iPhone, ones that were created before Apple

*found religion on* (热衷于) privacy, the F.B.I. may have been able to break into the device by itself.

- K) You can expect that *noose* (束缚) to continue to tighten. Experts said that whether or not Apple loses this specific case, measures that it could put into place in the future will almost certainly be able to further limit the government's reach.
- L) That's not to say that the outcome of the San Bernardino case is insignificant. As Apple and several security experts have argued, an order compelling Apple to write software that gives the F.B.I. access to the iPhone in question would establish an unsettling precedent. The order essentially asks Apple to hack its own devices, and once it is in place, the precedent could be used to justify law enforcement efforts to get around encryption technologies in other investigations far removed from national security threats.
- M) Once armed with a method for gaining access to iPhones, the government could ask to use it proactively (先发制人地), before a suspected terrorist attack - leaving Apple in a bind as to whether to comply or risk an attack and suffer a public-relations nightmare. "This is a brand-new salvo in the war against encryption," Mr. Opsahl said. "We've had plenty of debates in Congress and the media over whether the government should have a backdoor, and this is an end run around that - here they come with an order to create that backdoor."
- N) Yet it's worth noting that even if Apple ultimately loses this case, it has plenty of technical means to close a backdoor over time. "If they're anywhere near worth their salt as engineers, I bet they're rethinking their threat model as we speak," said Jonathan Zdziarski, a digital forensic expert who studies the iPhone and its vulnerabilities.
- O) One relatively simple fix, Mr. Zdziarski said, would be for Apple to modify future versions of the iPhone to require a user to enter a passcode before the phone will accept the sort of modified operating system that the F.B.I. wants Apple to create. That way, Apple could not unilaterally introduce a code that weakens the iPhone — a user would have to consent to it.
- P) "Nothing is 100 percent hacker-proof," Mr. Zdziarski said, but he pointed out that the judge's order in this case required Apple to provide "reasonable security assistance" to unlock Mr. Farook's phone. If Apple alters the security model of future iPhones so that even its own engineers' "reasonable assistance" will not be able to crack a given device when compelled by the government, a precedent set in this case might lose its lasting force. In other words, even if the F.B.I. wins this case, in the long run, it loses.

36. It is a popular belief that tech companies are committed to protecting their customers' private data.

37. The US government believes that its access to people's iPhones could be used to prevent terrorist attacks.

38. A federal court asked Apple to help the FBI access data in a terrorist's iPhone.

39. Privacy advocates now have Apple fighting alongside them against government access to personal data.
40. Snowden revealed that the American government had tried hard to access private data in massive scale.
41. The FBI might have been able to access private data in earlier iPhones without Apple's help.
42. After the Snowden incident, Apple made clear its position to counter government intrusion into personal data by means of encryption.
43. According to one digital expert, no iPhone can be entirely free from hacking.
44. Timothy Cook's long web post has helped enhance Apple's image.
45. Apple's CEO has decided to appeal the federal court's order to unlock a user's iPhone.

### Section C

**Directions:** There are 2 passages in this section. Each passage is followed by some questions or unfinished statements. For each of them there are four choices marked A), B), C), and D). You should decide on the best choice and mark the corresponding letter on Answer Sheet 2 with a single line through the centre.

#### Passage One

**Question 46 to 50 are based on the following passage.**

At the base of a mountain in Tanzania's Gregory Rift, Lake Natron burns bright red, surrounded by the remains of animals that were unfortunate enough to fall into the salty water. Bats, swallows and more are chemically preserved in the pose in which they perished, sealed in the deposits of sodium carbonate in the water. The lake's landscape is bizarre and deadly- and made even more so by the fact that it's the place where nearly 75percent of the world's flamingos(火烈鸟) are born.

The water is so corrosive that it can burn the skin and eyes of unadapted animals. Flamingos, however, are the only species that actually makes life in the midst of all that death. Once every three or four years, when conditions are right, the lake is covered with the pink birds as they stop flight to breed. Three -quarters of the world's flamingos fly over from other salt lakes in the Rift Valley and nest on salt- crystal islands that appear when the water is at eh specific level- too high and the birds can't build their nests, too low and predators can more briskly across the lake bed and attack. When the water hits the right level. The baby birds are kept safe form predators by a corrosive ditch.

"Flamingos have evolved very leathery skin on their legs so they can tolerate the salt water," says David Harper, a professor at the University of Leicester. " Humans cannot, and would die if their legs were exposed for any length of time." So far this year, water levels have been too high for the flamingos to nest.

Some fish, too, have had limited success vacationing at the lake as less salty lagoons (泻湖) form on the outer edges from hot springs flowing into Lake Natron. Three species of *tilapia* (罗非鱼) thrive there part-time. "Fish have a refuge in the streams and can expand into the lagoons when the lake is low and the lagoons are separate," Harper said. "All the lagoons join when the lake is high and fish must retreat to their stream refuges or die." Otherwise, no fish are able to survive in the naturally toxic lake.

This unique ecosystem may soon be under pressure. The Tanzanian government has once again started mining the lake

for soda ash, used for making chemicals, glass and detergents. Although the planned operation will be located more than 40 miles away, drawing the soda ash in through pipelines, conservationists worry it could still upset the natural water cycle and breeding grounds. For now, though, life prevails – even in a lake that kills almost everything it touches.

46. What can we learn about Lake Natron?
- A) It is simply uninhabitable for most animals.  
B) It remains little known to the outside world.  
C) It is a breeding ground for a variety of birds.  
D) It makes an ideal habitat for lots of predators.
47. Flamingos nest only when the lake water is at a specific level so that their babies can \_\_\_\_\_.
- A) find safe shelter more easily                      C) stay away from predators  
B) grow thick feathers on their feet                D) get accustomed to the salty water
48. Flamingos in the Rift Valley are unique in that \_\_\_\_\_.
- A) they can move swiftly across lagoons        C) they breed naturally in corrosive ditches  
B) they can survive well in salty water         D) they know where and when to nest
49. Why can certain species of tilapia sometimes survive around Lake Natron?
- A) They can take refuge in the less salty waters.  
B) They can flee quick enough from predators.  
C) They can move freely from lagoon to lagoon.  
D) They can stand the heat of the spring water.
50. What may be the consequence of Tanzanian government's planned operation?
- A) The accelerated extinction of flamingos.  
B) The change of flamingos' migration route.  
C) The overmining of Lake Natron's soda ash.  
D) The disruption of Lake Natron's ecosystem.

## Passage Two

Questions 51 to 55 are based on the following passage.

It is the season for some frantic last-minute math across the country, employees of all stripe are counting backward in an attempt to figure out just how much paid time-off they have left in their reserves. More of them, though, will skip those calculations altogether and just power through the holidays into 2017: More than half of American workers don't use up all of their allotted vacation days each year.

Not so long ago, people would have turned up their noses at that kind of dedication to the job. As marketing professors Silvia Bellezza, Neeru Paharia, and Anat Keinan recently explained in *Harvard Business Review (HBR)*, leisure time was once seen as an indicator of high social status, something attainable only for those at the top. Since the middle of the 20<sup>th</sup> century, though, things have turned the opposite way – these days, punishing hours at your desk, rather than days off, are seen as the mark of someone important.

In a series of several experiments, the researchers illustrated just how much we've come to admire busyness, or at least the appearance of it. Volunteers read two passages, one about a man who led a life of leisure and another about a man who

was over-worked and over-scheduled; when asked to determine which of the two had a higher social status, the majority of the participants said the latter. The same held true for people who used products that implied they were short on time: In one experiment, for example, customers of the grocery-delivery service Peapod were seen as of higher status than people who shopped at grocery stores that were equally expensive; in another, people wearing wireless headphones were considered further up on the social ladder than those wearing regular headphones, even when both were just used to listen to music.

51. What do most employees plan to do towards the end of the year?

- A) Go for a vacation.
- B) Keep on working.
- C) Set an objective for next year.
- D) Review the year's achievements.

52. How would people view dedication to work in the past?

- A) They would regard it as a matter of course.
- B) They would consider it a must for success.
- C) They would look upon it with contempt.
- D) They would deem it a trick of businessmen.

53. What did the researchers find through a series of experiments?

- A) The busier one appears, the more respect one earns.
- B) The more one works, the more one feels exploited.
- C) The more knowledge one has, the more competent one will be.
- D) The higher one's status, the more vacation time one will enjoy.

54. What may account for the change of people's attitude towards being busy?

- A) The fast pace of life in modern society.
- B) The fierce competition in the job market.
- C) The widespread use of computer technology.
- D) The role of knowledge in modern economy.

55. What does the author advise us to do at the end of the passage?

- A) Schedule our time properly for efficiency.
- B) Plan our weekends in a meaningful way.
- C) Plan time to relax however busy we are.
- D) Avoid appearing busy when we are not.

#### Part IV

#### Translation

(30 minutes)

**Directions:** For this part, you are allowed 30 minutes to translate a passage from Chinese into English. You should write your answer on **Answer Sheet 2**.

洞庭湖位于湖南省东北部，面积很大，但湖水很浅。洞庭湖是长江的蓄洪池，湖的大小很大程度上取决于季节变化。湖北和湖南两省因其与湖的相对位置而得名，湖北意为“湖的北边”，而湖南则为“湖的南边”。洞庭湖作为龙舟赛的发源地，在中国文化中享有盛名。据说龙舟赛始于洞庭湖东岸，为的是搜寻楚国爱国诗人屈原的遗体。龙舟赛与洞庭湖及周边的美景，每年都吸引着成千上万来自全国和世界各地的游客。
