It was a sunny day and I walked back home after school. When I stood in front of the door, I was shocked to find that the key had disappeared from my pocket. It was a disaster (灾难) for me, because I only had one key and my parents were gone for several days.

I walked around the community, hoping to find the lost key. But I couldn't find it. I called my mum and she told me to go to my aunt's home. My aunt lives in another building of our community. I was sad, but I had no choice. The next morning, when I was going to school, I saw something shining on the window of the security hut (保安亭). It was my key. "Unbelievable!" I was quite surprised as I held the key in my hands.

"Is that yours, kid?" the old guard asked.

"Yeah. I lost it yesterday. Who sent this?" I replied. The old man said, "I don't know. Someone picked it up last night."

To pick up a key from the ground and take it to the security hut is not something special, but it meant so much to me. I cannot express my thanks to the person who found my key. But I can pass on his or her kindness by following his or her steps to help others.

61 Why does some land have so many plants growing on it, while other land has almost no plants growing on it at all?

62 One is warmth. In very cold places, almost nothing grows. Plants also need water. In very dry parts of the earth, only a few unusual plants can grow. 63

Plants must also have a place in which to put down their roots and grow. 64 The town is built on hard land. The plants here have only the soil found between the cracks (裂缝) of the stones to grow in.

65 What will happen if we try to make things grow on the sandy beach? A few plants, such as beach grass, will grow in sand, but most plants won't. Even if the weather is warm enough and we water the plants each day, many of them will die because the sand on this beach has almost no food for plants.
