It's the week before school starts. Alice is shopping for clothes with two friends, Nina and Vicki. Alice puts on a black jacket, turns to her friends, and says, "Hey, what do you think?"

The girls look at her and both start laughing. "No way, Alice!"

Nina laughs. "That's a man's jacket."

Alice feels a little angry. "Yeah, well ... I like it."

"Yeah," says Vicki, "but what will people at school say?"

Vicki agrees. "It's true. You even have to have a certain kind of boyfriend or girlfriend! I think these 'rules' are childish (幼稚的). But when you're different, you feel like an outsider. And that's hard."

We humans are only born with one set of eyes, so it's our job to take care of them for our whole lives. The good news is that if we do a few simple things every day, we can maintain(保持) our eyesight and reduce(减少) the risk of ever hurting our eyes.

Almost all doctors agree that we can improve and maintain good eyesight by eating lots of fresh fruits and vegetables. It is especially important for us to eat vegetables like carrots and sweet potatoes. Besides, we need to protect our eyes when we spend a long time in bright sunlight. The best way to do this is by wearing sunglasses that have 100% UV(紫外线) protection. What's more, it is necessary to protect our eyes when we work with dangerous chemicals(化学物质). For this reason, we should always wear goggles in chemistry labs at work or at school. Finally, we should not spend too much time in front of the computer or television screen. **That** is why doctors advise if we have to use a computer for a long time, we should take a short break every fifteen or thirty minutes.

Maintaining good eyesight is important. If we do these few simple things we can protect our eyes and reduce the chances of losing our eyes. As the popular English expression goes, "It's all fun and game, until someone loses an eye." When people say this, they mean that losing an eye is a very terrible thing.

 - C. The Risk of Hurting Our Eyes
 - D. Born with One Set of Eyes

D

Today there are many more fires than in the past. Over 100,000 wildfires burn each year in America. Russia has 20,000 to 35,000 wildfires every year. Australia has on average 60,000 each year. These fires destroy (损害) huge areas of forests and burn hundreds of homes.

Many experts believe there are several reasons for this sudden increase in fires. The first reason is climate (气候) change. Recent weather has been warmer and drier. This leads to dangerous fire conditions. When lightning strikes (发生雷电), dry grass easily catches fire. Hot winds add to the problem. The wind spreads a fire quickly. In 2010, Russia had the hottest and driest summer in a century. In just one month, 500 fires destroyed over 2,000 homes. Some people lost their lives.

Traditional fire-fighting practices are another reason for the increase in fires. In America, firefighters used to quickly put out every fire. They didn't allow the grass and trees to burn. As a result, today many forests have thicker vegetation (植被). Thicker vegetation means more fuel (燃料) for fires. Also, without fires from time to time, forests become overcrowded and unhealthy. Some trees are dead. The dead wood then easily catches fire. So surprisingly, America has many more fires today partly because of its past firefighting practices.

Scientists now understand that a fire can be a natural part of a healthy forest. As a result, countries like Australia allow more fires to burn naturally. Sometimes, firefighters even start fires to get rid of (去除) dead wood. Of course, they carefully control the fires. The fire thins out old trees. This allows sunlight to reach the ground. As a result, fires help new trees to grow. Therefore, if a fire is not a serious threat (威胁) to people, firefighters may let it burn naturally.

72. Why did Russia have so many fires in one month in 2010?
- A. Because lightning spread the fire.
 - B. Because there was much fuel for fires.
 - C. Because there were not enough firefighters.
 - D. Because it was unusually hot, dry and windy.
73. What happens because of the traditional fire-fighting practices in the USA?
- A. There are fewer wildfires.
 - B. Trees and grass become thicker.
 - C. The weather becomes warmer and drier.
 - D. Sunlight reaches the ground to help forests.
74. What is the main idea of Paragraph 4?
- A. Fires are serious threats to human beings.
 - B. Australian firefighters don't put out fires.
 - C. Fires can play an important role in forests.
 - D. It's difficult for firefighters to control the fires.

75. Which of the following is true according to the passage?

- A. Not all the fires in the forests must be put out.
- B. People's carelessness leads to dangerous fires.
- C. Australia allows all the fires to burn naturally.
- D. There are more fires in Russia than in the USA.

One Possible Version:

Would you like to live in school? We had a survey about it and here’s the result.

Most students prefer to live in school because they find it convenient to communicate with their classmates. Also, they can learn how to look after themselves in this way.

However, some students think living at home is a better choice. The main reason is that they can relax better at home. Besides, they can spend more time with their family members and get on better with them.

As for me, I'd like to live in school. That's because I can spend more time on study.
What's more, it's a wonderful experience to live with other classmates.
