Claude Monet, Pablo Picasso and Leonardo da Vinci, the art world has never been short of talent. And now, a new painter is ready to join the list, although this one isn't even a human. Do you know the artificial intelligence (AI) program (人工智能程序)?

One of the world's most famous auction (拍卖) houses sold an AI-painted work for the very first time for \$432,000 (about 3,000,000 yuan ). The work shows a man with a mysterious look on his face. This AI painted program was written by a group of young French artists. This isn't the first example of AI-produced artwork because AI has already been used to write poems and make songs. However, many people doubt whether it should be called art at all.

According to Russian writer Leo Tolstoy (1828-1910), art is about creating feeling. It's "a way of joining people together in the same feeling", he once said. So, the feeling behind art is what makes it. The ability to create and use tools makes humans different from othersspecies. And as a tool itself, the AI artwork is the result of a lot of effort which was made by several artists. Together, they "fed" the AI a huge collection of paintings from the 14th to the 18th centuries, until it was able to work out how to make similar paintings of its own.

The introduction of AI art could be the beginning of a new artistic movement. However, not everyone is ready to welcome these high-tech artists just yet. The human mind is what's behind the AI technology. It is something that's full of opinions and something that changes over time.

Building a civilized city is our duty. As a teenager, I will try my best to be a good citizen and call on more people to do that. Because only when more people become civilized can our city be a better place to live in.

I will never forget that day when I went on a vacation to Hainan with my family. It was a wonderful place. While to my surprise, there was plenty of rubbish which broke the beautiful sightseeing. So I asked my families to pick up the rubbish together with the cleaners. At the same time, we made some signs and put them up to remind people to throw the waste paper into the dustbins. Our behaviors didn't get in the way of our vacation. Instead, it helped us relax and enjoy ourselves better.

In my opinion, in order to build a civilized city, we are supposed to make an effort to obey the rules in the society. What's more, we ought to be polite and friendly to others. Only in this way can our city become better and better.
