## 【题目】

Directions: For this part, you are allowed 30 minutes to write an essay on the use of translation apps. You can start your essay with the sentence "The use of translation apps is becoming increasingly popular." You should write at least 120 words but no more than 180 words.

## 【参考范文】

The use of translation apps is becoming increasingly popular these days. You could find many students learning English or a great number of travelers chatting with the local with the help of these apps. Therefore, these apps actually exert influence on our daily life.

Few people will dispute that the use of translation apps brings huge convenience to our ordinary life. Yet it may cause some invisible problems in the process of everyday indulging in these applications. For one thing, the efficiency offered by the translation apps will lead to such absolute dependence that students may gradually be unable to notice the differences of language forms between their mother tongue and the second language. For another, it is the dependence on the use of translation apps that makes it possible for tourists to excessively pursue fluency in communication.

Definitely the translation apps are good gifts that modern technology has given us.

However, whether they are beneficial largely depends on how we use them. Only in a balanced way can we fully enjoy the advantage of technology.
