Directions: For this part, you are allowed 30 minutes to write an essay on the use of translation apps. You can start your essay with the sentence "The use of translation apps is becoming increasingly popular. " You should write at least 120 words but no more than 180 words.

【参考范文】

The use of translation apps is becoming increasingly popular. One of the main reasons behind is the frequent communication home and abroad. However, few of individuals have had the opportunity to find out the trouble.

Granted, with translation tools to cope with challenges related to a foreign language, people, including both young and old generations, find it convenient to improve the working efficiency. Contrarily, for college students who prepare for the CET-4, the picture is quite the opposite. For instance, overreliance on the apps to figure out complex sentences in English makes it impossible for them to strengthen their capability of reading comprehension and accumulate vocabularies. Consequently, an ideal score they need can hardly be obtained.

Hence, it is my view that we are obliged to get rid of overindulgence in the apps. Also, what we should keep in mind is that assistance from the tools could merely be a temporary solution to the problems. Therefore, provided that one is eager to learn a foreign language, he

or she would fail to deny the saying that practice, rather than those apps, makes perfect.
