

## 四级长阅读真题答案及解析: Doctor' s orders: let children just play (广州新东方)

[A] imagine a drug that could enhance a child' s creativity and critical thinking. Imagine that this drug were simple to make, safe to take, and could be had for free. The nation' s leading pediatricians say this miracle compound exists. In a new clinical report, they are urging doctors to prescribe it liberally to the children in their care.

[B] “This may seem old-fashioned, but there are skills to be learned when kids aren' t told what to do,” said Dr. Michael Yogman, a Harvard Medical School pediatrician who led the drafting of the call to arms. 【略读】 Whether it' s rough-and-tumble physical play, outdoor play or social or pretend play, kids derive important lessons from the chance to make things up as they go, he said.

### 【匹配 45】

[C] The advice, issued Monday by the American Academy of Pediatrics, 【略读】 may come as a shock to some parents. After spending years fretting over which toys to buy, which apps to download and which skill-building programs to send their kids to after school, 【略读】 letting them simply play — or better yet, playing with them — 【略读】 could seem like a step backward. 【匹配 42】 The pediatricians insist that it' s not. The academy' s guidance does not include

specific recommendations for the dosing of play. Instead, it asks doctors to advise parents before their babies turn 2 that play is essential to healthy development.

[D] “Play is not silly behavior,” the academy’s report declares. It fosters children’s creativity, cooperation and problem-solving skills —all of which are critical for a 21st century workforce.— 【略读】 When parents engage in play with their children, it builds a wall against the harmful effects of all kinds of stress, 【匹配 40】 including poverty, the academy says. In the pediatricians’ view, essentially every life skill that’s valued in adults can be built up with play. “Collaboration, negotiation, decision-making, creativity, leadership, and increased physical activity are just some of the skills and benefits children gain through play,” they wrote. The pediatricians’ appeal comes as American kids are being squeezed by increasing academic demands at school, the constant invasion of digital media.

[E] The trends have been a long time coming. Between 1981 and 1997, detailed time-use studies showed that the time children spent at play declined by 25%. Since the adoption of sweeping education reforms in 2001, public schools have steadily increased the amount of time devoted to preparing for standardized tests. The focus on academic “skills and drills” has cut deeply into recess and other time for free play. 【匹配 37】

[F] By 2009, a study of Los Angeles kindergarten classrooms found that 5-year-olds were so burdened with academic requirements that they were down to an average of just 19 minutes per day of “choice time,” when they were permitted to play freely with blocks, toys or other children. One in four Los Angeles teachers reported there was no time at all for “free play.” 【匹配 44】 Increased academic pressures have left 30% of U.S. kindergarten classes without any recess. Such findings prompted the American Academy of Pediatrics to issue a policy statement in 2013 on the “crucial role of recess in school.”

[G] Pediatricians aren't the only ones who have noticed. In a report titled “Crisis in the Kindergarten,” a consortium of educators, health professionals and child advocates called the loss of play in early childhood “a tragedy, both for the children themselves and for our nation and world.” 【匹配 39】

Young kids in play-based kindergartens “end up equally good or better at reading and other intellectual skills, and they are more likely to become well-adjusted healthy people,” the Alliance for Childhood said in 2009. Indeed, new research demonstrates why playing with blocks might have been time better spent, Yogman said. The trial assessed the effectiveness of an early mathematics intervention aimed at preschoolers. The results showed almost no gains in math achievement.

[H] Another playtime thief: the growing proportion of kids' time spent in front of screens and digital devices 【匹配 36】, even among preschoolers. Last year, Common Sense Media reported that children up through age 8 spent an average of two hours and 19 minutes in front of screens each day. That included an average of 42 minutes a day for children under 2. This escalation of digital use comes with rising risks of obesity, sleep deprivation and cognitive, language and social-emotional delays, the American Academy of Pediatrics warned in 2016.

[I] “I respect that parents have busy lives and it's easy to hand a child an iPhone,” Yogman said. “But there's a cost to that. For young children, it's much too passive. And kids really learn better when they're actively engaged and have to really discover things.” 【匹配 41】

[J] The decline of play is a special hazard for the roughly 1 in 5 children in the United States who lives in poverty. These 14 million children most urgently need to develop the resilience that is nurtured with play. Instead, Yogman said, they are disproportionately affected by some of the trends that are making play scarce: academic pressures at schools that need to improve test scores, outside play areas that are limited or unsafe, and parents who lack the time or energy to share in playtime.

[K] Yogman also worries about the pressures that squeeze playtime for more

affluent kids. “The notion that as parents we need to schedule every minute of their time is not doing them a great service,” he said. Even well-meaning parents may be “robbing them of the opportunity to have that joy of discovery and curiosity — the opportunity to find things out on their own.”

[L] Play may not be a hard sell to kids. But UCLA pediatrician Carlos Lerner acknowledged that the pediatricians’ new prescription may meet with skepticism from parents 【匹配 38】, who are anxious for advice on how to give their kids a leg up in the world. They should welcome the simplicity of the message, Lerner said. “It’s liberating to be able to offer them this advice: that you spending time with your child and letting him play is one of the most valuable things you can do,” he said. “It doesn’t have to involve spending a lot of money or time, or joining a parenting group. It’s something we can offer that’s achievable. They just don’t recognize it right now as particularly valuable.”

H 36. Increased use of digital devices steals away children’s playtime.

【H 段: Another playtime thief: the growing proportion of kids’ time spent in front of screens and digital devices.】

【同义替换: Thief 和 steal away 替换, the growing proportion of kids’ time spent in front of screens and digital devices 和 increased use of digital devices 替换。】

E37. Since the beginning of this century, an increasing amount of time has been shifted in public schools from recess to academic activities.

【E段: Since the adoption of sweeping education reforms in 2001, public schools have steadily increased the amount of time devoted to preparing for standardized tests. The focus on academic “skills and drills” has cut deeply into recess and other time for free play.】

【同义替换: Since the adoption of sweeping education reforms in 2001 和 since the beginning of this century 替换, increased the amount of time devoted to preparing for standardized tests 和 an increasing amount of time has been shifted to academic activities 替换, recess 是原词】

L38. it has been acknowledged that while kids may welcome pediatricians' recommendation, their parents may doubt its feasibility.

【L段: Play may not be a hard sell to kids. But UCLA pediatrician Carlos Lerner acknowledged that the pediatricians' new prescription may meet with skepticism from parents】

【同义替换: play may not be a hard sell to kids 和 kids welcome ... 替换, meet with skepticism from parents 和 their parents may doubt its feasibility 替换】

G39. According to some professionals, deprivation of young children's playtime will do harm not only to children themselves but to the country and the world.

【G段: health professionals and child advocates called the loss of play in early

childhood “a tragedy, both for the children themselves and for our nation and world.”】

【同义替换: loss of play 和 deprivation of young children’ s playtime 替换, tragedy 和 do harm 替换, nation 和 country 替换】

D40. By playing with children, parents can prevent them from being harmed by stress.

【D 段: When parents engage in play with their children, it builds a wall against the harmful effects of all kinds of stress.】

【同义替换: builds a wall against...和 prevent ... from 替换。】

I41. playing with digital devices discourages kids from active discovery, according to pediatrician Dr. Michael Yogman.

【I 段: “But there’ s a cost to that. For young children, it’ s much too passive. And kids really learn better when they’ re actively engaged and have to really discover things.”】

【同义替换: passive 和 discourage 替换】

C42. The suggestion of letting children simply play may sound like going backwards to parents who want to help build their children’ s skills.

【C 段: The advice may come as a shock to some parents...letting them simply play could seem like a step backward.】

【同义替换: suggestion 和 advice 替换, may sound like going backwards 和 could seem like a step backward 替换】

K43. Dr. Michael Yogman

F44. One quarter of teachers

B 45. According to a pediatricians, no matter what kind of play
