首段：引出主题 (最近在线图书馆非常流行)

Online libraries are becoming increasingly popular over the past quarter of a century, since online libraries can, as you are probably aware, benefit a vast majority of people, especially college students, in ways that a physical library full of hard copy books can hardly compare with.

中段：分析原因 (为啥在线图书馆好)

可能原因 1：方便 快捷 随时随地

可能原因 2 : 价格低廉

As online libraries feature round-the-clock service, reading or borrowing books online is the easiest and most cost-effective way for students to broaden their horizons and gain access to the specialist and up-to-the-minute cutting-edge knowledge even in the comfort of their own home, saving them a lot of trouble. For instance, some books, in earlier times, were either not easily available or pretty expensive. Now every type of book is available online either free or with a very low sale price. Now students can search for any book they want and download them on both laptops and smartphones.
